Q2 Is your state considering accepting registrant sponsored and provided dicamba or auxin specific training to meet the training requirement? **Yes**

Q3 What would be the conditions that you would require in order to accept registrant sponsored and delivered training?

Review of training and inclusion of state-specific module for state requirements of RUP sales and recordkeeping.

Q4 If your state would accept registrant dicamba or auxin specific training, would you accept in-person training, on-line training, both, or no preference? **In-person training preferred.**

Q5 Is your state considering developing your own State specific dicamba or auxin training for 2018? **Yes**

AAPCO State Dicamba Survey - Training and Damage

Q6 If your state sponsored and provided training last year, does your state plan to continue to offer state provided auxin or dicamba-specific training in 2018 to assist applicators in meeting the training requirement?

We did not sponsor or provide training last year.

Q7 Does the State Lead Agency, Extension System or another entity provide your training?

Both

Q8 Does your state provide CEU's for the Dicamba or auxin specific training?

No

Q9 Approximately how long does the training take from start to finish in hours?

1

Q10 Dicamba or auxin specific training is required yearly. Does your state have the resources (financial and personnel) to continue to provide this training?

No

Q11 Are there conditions that could be met that would change your mind from requiring state sponsored and delivered training to allowing registrant sponsored and delivered training?

Yes (If yes, please provide additional information below).

The following conditions would have to be met to accept registrant sponsored and delivered training.:

Registrants will have to use the state-developed training in addition to their own as a condition of registration.

Q12 It is important to understand the impacts of damage beyond soybeans and cotton. Can your state quantify damage to other crops/plants in 2017? (e.g., tomatoes, watermelon, cantaloupe, vineyards, pumpkins, organic vegetables, tobacco, residential gardens, trees and shrubs, etc.) Other crops/plants?

Quantify? - No. We only collected anecdotal information on the acres or amounts of other plants that were damaged.

Q2 Is your state considering accepting registrant sponsored and provided dicamba or auxin specific training to meet the training requirement? **Yes**

Q3 What would be the conditions that you would require in order to accept registrant sponsored and delivered training?

NM has not made any definitive decisions, but we are leaning towards in-person training provided by registrant and facilitated by NMDA.

Q4 If your state would accept registrant dicamba or auxin specific training, would you accept in-person training, on-line training, both, or no preference? **In-person training preferred.**

Q5 Is your state considering developing your own State specific dicamba or auxin training for 2018? **No**

Q6 If your state sponsored and provided training last year, does your state plan to continue to offer state provided auxin or dicamba-specific training in 2018 to assist applicators in meeting the training requirement? **We did not sponsor or provide training last year.**

AAPCO State Dicamba Survey - Training and Damage

Q7 Does the State Lead Agency, Extension System or another entity provide your training?

No training for Dicamba.

Q8 Does your state provide CEU's for the Dicamba or auxin specific training? **Not applicable**

Q9 Approximately how long does the training take from start to finish in hours?

NA

Q10 Dicamba or auxin specific training is required yearly. Does your state have the resources (financial and personnel) to continue to provide this training? **No**

Q11 Are there conditions that could be met that would change your mind from requiring state sponsored and delivered training to allowing registrant sponsored and delivered training? **Not applicable. State sponsored and delivered training is not required.**

Q12 It is important to understand the impacts of damage beyond soybeans and cotton. Can your state quantify damage to other crops/plants in 2017? (e.g., tomatoes, watermelon, cantaloupe, vineyards, pumpkins, organic vegetables, tobacco, residential gardens, trees and shrubs, etc.) Other crops/plants?

No damage

Q2 Is your state considering accepting registrant sponsored and provided dicamba or auxin specific training to meet the training requirement? **Yes**

Q3 What would be the conditions that you would require in order to accept registrant sponsored and delivered training?

Content of the training
 Covering state specific issues such as weather, topography, sensitive crops
 In-Person

Q4 If your state would accept registrant dicamba or auxin specific training, would you accept in-person training, on-line training, both, or no preference? **In-person training preferred.**

Q5 Is your state considering developing your own State specific dicamba or auxin training for 2018? **Yes**

AAPCO State Dicamba Survey - Training and Damage

Q6 If your state sponsored and provided training last year, does your state plan to continue to offer state provided auxin or dicamba-specific training in 2018 to assist applicators in meeting the training requirement? **Yes**

Q7 Does the State Lead Agency, Extension System or another entity provide your training?

Extension

Q8 Does your state provide CEU's for the Dicamba or auxin specific training? **No**

Q9 Approximately how long does the training take from start to finish in hours?

3.5

Q10 Dicamba or auxin specific training is required yearly. Does your state have the resources (financial and personnel) to continue to provide this training? **No**

Q11 Are there conditions that could be met that would change your mind from requiring state sponsored and delivered training to allowing registrant sponsored and delivered training?

Yes (If yes, please provide additional information below).
The following conditions would have to be met to accept registrant sponsored and delivered training.:
Appropriate content, length,
messaging.

Q12 It is important to understand the impacts of damage beyond soybeans and cotton. Can your state quantify damage to other crops/plants in 2017? (e.g., tomatoes, watermelon, cantaloupe, vineyards, pumpkins, organic vegetables, tobacco, residential gardens, trees and shrubs, etc.) Other crops/plants?

Q2 Is your state considering accepting registrant sponsored and provided dicamba or auxin specific training to meet the training requirement? **Yes**

Q3 What would be the conditions that you would require in order to accept registrant sponsored and delivered training?

We would require specific language in the training regarding label compliance. Each training may also be audited by KDA personnel to ensure that the appropriate material is covered.

Q4 If your state would accept registrant dicamba or auxin specific training, would you accept in-person training, on-line training, both, or no preference? **In-person training only.**

Q5 Is your state considering developing your own State specific dicamba or auxin training for 2018? **No**

Q6 If your state sponsored and provided training last year, does your state plan to continue to offer state provided auxin or dicamba-specific training in 2018 to assist applicators in meeting the training requirement? **We did not sponsor or provide training last year.**

AAPCO State Dicamba Survey - Training and Damage

Q7 Does the State Lead Agency, Extension System or another entity provide your training?

We did not provide training in 2017 and will most likely approve registrant sponsored training in 2018.

Q8 Does your state provide CEU's for the Dicamba or auxin specific training? **Yes**

Q9 Approximately how long does the training take from start to finish in hours?

We have not conducted any to date, so not sure. Anticipating 3 to 4 hours.

Q10 Dicamba or auxin specific training is required yearly. Does your state have the resources (financial and personnel) to continue to provide this training? **Yes**

Q11 Are there conditions that could be met that would change your mind from requiring state sponsored and delivered training to allowing registrant sponsored and delivered training?

Yes (If yes, please provide additional information below).

The following conditions would have to be met to accept registrant sponsored and delivered training.:

Financial resources for the development and delivery of the training would be the primary deciding factor.

Q12 It is important to understand the impacts of damage beyond soybeans and cotton. Can your state quantify damage to other crops/plants in 2017? (e.g., tomatoes, watermelon, cantaloupe, vineyards, pumpkins, organic vegetables, tobacco, residential gardens, trees and shrubs, etc.) Other crops/plants?

We had minimal damage to crops other than soybeans.

Q2 Is your state considering accepting registrant sponsored and provided dicamba or auxin specific training to meet the training requirement? **No**

Q3 What would be the conditions that you would require in order to accept registrant sponsored and delivered training?

1. Have ample time to preview & require edits or revisions.
 2. Require face to face training.
 3. Have adequate advance notice of the training sessions to allow for SLA monitoring.
 4. Have ready access to training attendee records (more so than what was done with the soil fumigants). more
-

Q4 If your state would accept registrant dicamba or auxin specific training, would you accept in-person training, on-line training, both, or no preference? **In-person training only.**

Q5 Is your state considering developing your own State specific dicamba or auxin training for 2018? **Yes**

AAPCO State Dicamba Survey - Training and Damage

Q6 If your state sponsored and provided training last year, does your state plan to continue to offer state provided auxin or dicamba-specific training in 2018 to assist applicators in meeting the training requirement?

We did not sponsor or provide training last year.

Q7 Does the State Lead Agency, Extension System or another entity provide your training?

SLA, CES, and some industry members can all be trainers and program sponsors.

Q8 Does your state provide CEU's for the Dicamba or auxin specific training?

Yes

Q9 Approximately how long does the training take from start to finish in hours?

Unknown, it is still under development, but guessing at least an hour.

Q10 Dicamba or auxin specific training is required yearly. Does your state have the resources (financial and personnel) to continue to provide this training?

No

Q11 Are there conditions that could be met that would change your mind from requiring state sponsored and delivered training to allowing registrant sponsored and delivered training?

No. Registrant sponsored and delivered training will not be accepted.

,
The following conditions would have to be met to accept registrant sponsored and delivered training.:

We might consider registrant sponsored training in subsequent years after the applicator has been through state sponsored training at least once.

Q12 It is important to understand the impacts of damage beyond soybeans and cotton. Can your state quantify damage to other crops/plants in 2017? (e.g., tomatoes, watermelon, cantaloupe, vineyards, pumpkins, organic vegetables, tobacco, residential gardens, trees and shrubs, etc.) Other crops/plants?

No. It is still to early in the investigation processing. The six cases processed to date have all been related to soybean exposure.

Q2 Is your state considering accepting registrant sponsored and provided dicamba or auxin specific training to meet the training requirement? **Yes**

Q3 What would be the conditions that you would require in order to accept registrant sponsored and delivered training?

LDAF has 24c's requiring any person: selling, applying and purchasing these products must complete a training course by the manufacturer, approved by LDAF. A list of all persons completing the training course must be sent to LDAF.

Q4 If your state would accept registrant dicamba or auxin specific training, would you accept in-person training, on-line training, both, or no preference? **In-person training only.**

Q5 Is your state considering developing your own State specific dicamba or auxin training for 2018? **Yes**

Q6 If your state sponsored and provided training last year, does your state plan to continue to offer state provided auxin or dicamba-specific training in 2018 to assist applicators in meeting the training requirement? **Yes**

Q7 Does the State Lead Agency, Extension System or another entity provide your training?

SLA

Q8 Does your state provide CEU's for the Dicamba or auxin specific training? **No**

Q9 Approximately how long does the training take from start to finish in hours?

Approximately 3 hours

Q10 Dicamba or auxin specific training is required yearly. Does your state have the resources (financial and personnel) to continue to provide this training? **No**

Q11 Are there conditions that could be met that would change your mind from requiring state sponsored and delivered training to allowing registrant sponsored and delivered training?

Yes (If yes, please provide additional information below).

The following conditions would have to be met to accept registrant sponsored and delivered training.:

If registrants would have required mandatory training/stewardship as stated in the early phases of the registration process. All manufacturers stressed stewardship, Dow was the only manufacturer to provide mandatory stewardship training for their product.

Q12 It is important to understand the impacts of damage beyond soybeans and cotton. Can your state quantify damage to other crops/plants in 2017? (e.g., tomatoes, watermelon, cantaloupe, vineyards, pumpkins, organic vegetables, tobacco, residential gardens, trees and shrubs, etc.) Other crops/plants?

Louisiana had 2 official complaints on Soybeans totaling approximately 40 acres.

Q2 Is your state considering accepting registrant sponsored and provided dicamba or auxin specific training to meet the training requirement? **Yes**

Q3 What would be the conditions that you would require in order to accept registrant sponsored and delivered training?

Must meet a training criteria that meets label and EPA requirements.

Q4 If your state would accept registrant dicamba or auxin specific training, would you accept in-person training, on-line training, both, or no preference? **Both in-person or on-line training (no preference)**

Q5 Is your state considering developing your own State specific dicamba or auxin training for 2018? **No**

Q6 If your state sponsored and provided training last year, does your state plan to continue to offer state provided auxin or dicamba-specific training in 2018 to assist applicators in meeting the training requirement? **We did not sponsor or provide training last year.**

AAPCO State Dicamba Survey - Training and Damage

Q7 Does the State Lead Agency, Extension System or another entity provide your training?

Extension System

Q8 Does your state provide CEU's for the Dicamba or auxin specific training?

Not applicable

Q9 Approximately how long does the training take from start to finish in hours?

Respondent skipped this question

Q10 Dicamba or auxin specific training is required yearly. Does your state have the resources (financial and personnel) to continue to provide this training?

No

Q11 Are there conditions that could be met that would change your mind from requiring state sponsored and delivered training to allowing registrant sponsored and delivered training?

Not applicable. State sponsored and delivered training is not required.

Q12 It is important to understand the impacts of damage beyond soybeans and cotton. Can your state quantify damage to other crops/plants in 2017? (e.g., tomatoes, watermelon, cantaloupe, vineyards, pumpkins, organic vegetables, tobacco, residential gardens, trees and shrubs, etc.) Other crops/plants?

Wisconsin had no instances of dicamba (new technology) related damage to non-soybean crops.

Q2 Is your state considering accepting registrant sponsored and provided dicamba or auxin specific training to meet the training requirement? **Yes**

Q3 What would be the conditions that you would require in order to accept registrant sponsored and delivered training?

A minimum of a 4 hour training course taught by the manufactures covering nozzles, temp, wind, volatility of the products, studies on inversions, pre vs post applications. Must take an exam after the class showing the applicator understands how to use the product

Q4 If your state would accept registrant dicamba or auxin specific training, would you accept in-person training, on-line training, both, or no preference? **In-person training preferred.**

Q5 Is your state considering developing your own State specific dicamba or auxin training for 2018? **No**

Q6 If your state sponsored and provided training last year, does your state plan to continue to offer state provided auxin or dicamba-specific training in 2018 to assist applicators in meeting the training requirement? **We did not sponsor or provide training last year.**

AAPCO State Dicamba Survey - Training and Damage

Q7 Does the State Lead Agency, Extension System or another entity provide your training?

SD Department of Ag or extension do not or id not provide dicamba or auxin training. Prior to the 2017 spray season Monsanto and BASF put on several meetings on how to use these products and reviewed the label in depth. There were several large ag retail locations who also did a great job of training private applicators on the use of the these products with a manufacturing rep assisting with the training of the use of the products. Training and more training will not keep the products from volatizing.

Q8 Does your state provide CEU's for the Dicamba or auxin specific training? **Not applicable**

Q9 Approximately how long does the training take from start to finish in hours?

N/A but we think it should be 3-4 hours

Q10 Dicamba or auxin specific training is required yearly. Does your state have the resources (financial and personnel) to continue to provide this training? **No**

Q11 Are there conditions that could be met that would change your mind from requiring state sponsored and delivered training to allowing registrant sponsored and delivered training?

Not applicable. State sponsored and delivered training is not required.

,
The following conditions would have to be met to accept registrant sponsored and delivered training.:
SD believes the manufactures/registrants should be the trainers. Every article I read the applicators were to blame on the misuse of the products. The registrants train, then it their issue not the states if we have issues in 2018.

Q12 It is important to understand the impacts of damage beyond soybeans and cotton. Can your state quantify damage to other crops/plants in 2017? (e.g., tomatoes, watermelon, cantaloupe, vineyards, pumpkins, organic vegetables, tobacco, residential gardens, trees and shrubs, etc.) Other crops/plants?

yes, SD had several issues with the products moving off target to other plants (trees, tomatoes, etc)

Q2 Is your state considering accepting registrant sponsored and provided dicamba or auxin specific training to meet the training requirement? **Yes**

Q3 What would be the conditions that you would require in order to accept registrant sponsored and delivered training?

Comprehensive training similar to the training given by NC, GA, and AL this year.

Q4 If your state would accept registrant dicamba or auxin specific training, would you accept in-person training, on-line training, both, or no preference? **In-person training preferred.**

Q5 Is your state considering developing your own State specific dicamba or auxin training for 2018? **No**

Q6 If your state sponsored and provided training last year, does your state plan to continue to offer state provided auxin or dicamba-specific training in 2018 to assist applicators in meeting the training requirement? **We did not sponsor or provide training last year.**

AAPCO State Dicamba Survey - Training and Damage

Q7 Does the State Lead Agency, Extension System or another entity provide your training?

Cooperative Extension, and Registrant training provided for certain applicator groups now.

Q8 Does your state provide CEU's for the Dicamba or auxin specific training? **Yes**

Q9 Approximately how long does the training take from start to finish in hours?

Not currently giving training in SC

Q10 Dicamba or auxin specific training is required yearly. Does your state have the resources (financial and personnel) to continue to provide this training? **No**

Q11 Are there conditions that could be met that would change your mind from requiring state sponsored and delivered training to allowing registrant sponsored and delivered training?

Yes (If yes, please provide additional information below).
The following conditions would have to be met to accept registrant sponsored and delivered training.:
Yes, Registrant provided training will be allowed in SC

Q12 It is important to understand the impacts of damage beyond soybeans and cotton. Can your state quantify damage to other crops/plants in 2017? (e.g., tomatoes, watermelon, cantaloupe, vineyards, pumpkins, organic vegetables, tobacco, residential gardens, trees and shrubs, etc.) Other crops/plants?

No damage was reported or observed by DPR except three cases in which soybeans exhibited herbicide damage.

Q2 Is your state considering accepting registrant sponsored and provided dicamba or auxin specific training to meet the training requirement? **Yes**

Q3 What would be the conditions that you would require in order to accept registrant sponsored and delivered training?

We have some way of verifying that the training occurred for each individual.

Q4 If your state would accept registrant dicamba or auxin specific training, would you accept in-person training, on-line training, both, or no preference? **Both in-person or on-line training (no preference)**

Q5 Is your state considering developing your own State specific dicamba or auxin training for 2018? **No**

Q6 If your state sponsored and provided training last year, does your state plan to continue to offer state provided auxin or dicamba-specific training in 2018 to assist applicators in meeting the training requirement? **We did not sponsor or provide training last year.**

Q7 Does the State Lead Agency, Extension System or another entity provide your training?

We all provide training, including the private sector.

Q8 Does your state provide CEU's for the Dicamba or auxin specific training? **No**

Q9 Approximately how long does the training take from start to finish in hours?

We currently have not had any. But our law allows 1 CEU is 50 minutes.

Q10 Dicamba or auxin specific training is required yearly. Does your state have the resources (financial and personnel) to continue to provide this training? **No**

Q11 Are there conditions that could be met that would change your mind from requiring state sponsored and delivered training to allowing registrant sponsored and delivered training? **Not applicable. State sponsored and delivered training is not required.**

Q12 It is important to understand the impacts of damage beyond soybeans and cotton. Can your state quantify damage to other crops/plants in 2017? (e.g., tomatoes, watermelon, cantaloupe, vineyards, pumpkins, organic vegetables, tobacco, residential gardens, trees and shrubs, etc.) Other crops/plants?

Cotton is not as sensitive as soybean. However, this issue is of great concern. It is also of concern that they have to get this credit yearly and depending on the length growers could end up only taking CEUs relating to this chemistry.

Q2 Is your state considering accepting registrant sponsored and provided dicamba or auxin specific training to meet the training requirement? **Yes**

Q3 What would be the conditions that you would require in order to accept registrant sponsored and delivered training?

Training should be conducted by a person with direct technical knowledge of the product(s). Avoid training being conducted by a general knowledge sales representative. Registrant would need to submit contents of training for approval. There needs to be some kind of completion tracking system in place.

Q4 If your state would accept registrant dicamba or auxin specific training, would you accept in-person training, on-line training, both, or no preference? **On-line training preferred.**

Q5 Is your state considering developing your own State specific dicamba or auxin training for 2018? **No**

AAPCO State Dicamba Survey - Training and Damage

Q6 If your state sponsored and provided training last year, does your state plan to continue to offer state provided auxin or dicamba-specific training in 2018 to assist applicators in meeting the training requirement?

We did not sponsor or provide training last year.

Q7 Does the State Lead Agency, Extension System or another entity provide your training?

Not applicable if referring to question 6. Cooperative Extension conducts most of the agriculturally based training in Delaware.

Q8 Does your state provide CEU's for the Dicamba or auxin specific training?

Not applicable

Q9 Approximately how long does the training take from start to finish in hours?

N/A. There has not been any dicamba or auxin specific training submitted to date.

Q10 Dicamba or auxin specific training is required yearly. Does your state have the resources (financial and personnel) to continue to provide this training?

No

Q11 Are there conditions that could be met that would change your mind from requiring state sponsored and delivered training to allowing registrant sponsored and delivered training?

Not applicable. State sponsored and delivered training is not required.

,
The following conditions would have to be met to accept registrant sponsored and delivered training.:
Prefer registrant conduct training. Cost associated with training should be incurred by the company producing the product that is having issues.

Q12 It is important to understand the impacts of damage beyond soybeans and cotton. Can your state quantify damage to other crops/plants in 2017? (e.g., tomatoes, watermelon, cantaloupe, vineyards, pumpkins, organic vegetables, tobacco, residential gardens, trees and shrubs, etc.) Other crops/plants?

Delaware had no reported damage in 2017. Very concerned due to the amount of vegetable production in the state.

Q2 Is your state considering accepting registrant sponsored and provided dicamba or auxin specific training to meet the training requirement? **Yes**

Q3 What would be the conditions that you would require in order to accept registrant sponsored and delivered training?

Some form of documentation confirming that the training had been completed in the applicator's records.

Q4 If your state would accept registrant dicamba or auxin specific training, would you accept in-person training, on-line training, both, or no preference? **Both in-person or on-line training (no preference)**

Q5 Is your state considering developing your own State specific dicamba or auxin training for 2018? **No**

Q6 If your state sponsored and provided training last year, does your state plan to continue to offer state provided auxin or dicamba-specific training in 2018 to assist applicators in meeting the training requirement? **We did not sponsor or provide training last year.**

AAPCO State Dicamba Survey - Training and Damage

Q7 Does the State Lead Agency, Extension System or another entity provide your training?

CSU Extension or other workshop providers may provide training during annual CEC courses. These would be submitted and approved by the state, same as other CEC sessions.

Q8 Does your state provide CEU's for the Dicamba or auxin specific training? **No**

Q9 Approximately how long does the training take from start to finish in hours? **Respondent skipped this question**

Q10 Dicamba or auxin specific training is required yearly. Does your state have the resources (financial and personnel) to continue to provide this training? **No**

Q11 Are there conditions that could be met that would change your mind from requiring state sponsored and delivered training to allowing registrant sponsored and delivered training? **Not applicable. State sponsored and delivered training is not required.**

Q12 It is important to understand the impacts of damage beyond soybeans and cotton. Can your state quantify damage to other crops/plants in 2017? (e.g., tomatoes, watermelon, cantaloupe, vineyards, pumpkins, organic vegetables, tobacco, residential gardens, trees and shrubs, etc.) Other crops/plants?

No. Luckily, Colorado had no complaints related to the use of dicamba in 2017.

Q2 Is your state considering accepting registrant sponsored and provided dicamba or auxin specific training to meet the training requirement? **Unknown**

Q3 What would be the conditions that you would require in order to accept registrant sponsored and delivered training?

Registrant training include state specific information.

Q4 If your state would accept registrant dicamba or auxin specific training, would you accept in-person training, on-line training, both, or no preference? **In-person training preferred.**

Q5 Is your state considering developing your own State specific dicamba or auxin training for 2018? **Unknown**

AAPCO State Dicamba Survey - Training and Damage

Q6 If your state sponsored and provided training last year, does your state plan to continue to offer state provided auxin or dicamba-specific training in 2018 to assist applicators in meeting the training requirement? **Yes**

Q7 Does the State Lead Agency, Extension System or another entity provide your training?

Extension Service

Q8 Does your state provide CEU's for the Dicamba or auxin specific training? **Yes**

Q9 Approximately how long does the training take from start to finish in hours?

Don't know at present, but 1 CEU would be awarded per hour of training.

Q10 Dicamba or auxin specific training is required yearly. Does your state have the resources (financial and personnel) to continue to provide this training? **Unknown**

Q11 Are there conditions that could be met that would change your mind from requiring state sponsored and delivered training to allowing registrant sponsored and delivered training?

Yes (If yes, please provide additional information below).
The following conditions would have to be met to accept registrant sponsored and delivered training.:
Would need to review the registrant training, if registrant training was provided only.

Q12 It is important to understand the impacts of damage beyond soybeans and cotton. Can your state quantify damage to other crops/plants in 2017? (e.g., tomatoes, watermelon, cantaloupe, vineyards, pumpkins, organic vegetables, tobacco, residential gardens, trees and shrubs, etc.) Other crops/plants?

Not at the present time.

Q2 Is your state considering accepting registrant sponsored and provided dicamba or auxin specific training to meet the training requirement? **Unknown**

Q3 What would be the conditions that you would require in order to accept registrant sponsored and delivered training?

IDALS is working with Iowa State University, and others involved in pesticide safety education within the Midwest region to outline conditions, format and implementation of label-specific training.

We continue to ask for guidance on EPA's conditions for this label training requirement.

Q4 If your state would accept registrant dicamba or auxin specific training, would you accept in-person training, on-line training, both, or no preference? **On-line training preferred.**

Q5 Is your state considering developing your own State specific dicamba or auxin training for 2018? **Unknown**

AAPCO State Dicamba Survey - Training and Damage

Q6 If your state sponsored and provided training last year, does your state plan to continue to offer state provided auxin or dicamba-specific training in 2018 to assist applicators in meeting the training requirement?

We did not sponsor or provide training last year.

Q7 Does the State Lead Agency, Extension System or another entity provide your training?

Extension as well as approved third party providers

Q8 Does your state provide CEU's for the Dicamba or auxin specific training?

No

Q9 Approximately how long does the training take from start to finish in hours?

Unknown

Q10 Dicamba or auxin specific training is required yearly. Does your state have the resources (financial and personnel) to continue to provide this training?

Unknown

Q11 Are there conditions that could be met that would change your mind from requiring state sponsored and delivered training to allowing registrant sponsored and delivered training?

Not applicable. State sponsored and delivered training is not required.

,
The following conditions would have to be met to accept registrant sponsored and delivered training.:

At this time, the answer is not applicable. Iowa is still working with university specialists, educators, stakeholders, co-regulators and registrants to determine how this label training can be made available in 2018.

Q12 It is important to understand the impacts of damage beyond soybeans and cotton. Can your state quantify damage to other crops/plants in 2017? (e.g., tomatoes, watermelon, cantaloupe, vineyards, pumpkins, organic vegetables, tobacco, residential gardens, trees and shrubs, etc.) Other crops/plants?

IDALS enforcement program does not directly quantify damage as part of our pesticide enforcement response.

However, off-target sites will be documented and can be communicated in reporting.

Q2 Is your state considering accepting registrant sponsored and provided dicamba or auxin specific training to meet the training requirement? **No**

Q3 What would be the conditions that you would require in order to accept registrant sponsored and delivered training?

Be approved by Dr. Alan York at NCSU and include the presentation that he has developed.

Q4 If your state would accept registrant dicamba or auxin specific training, would you accept in-person training, on-line training, both, or no preference? **In-person training preferred.**

Q5 Is your state considering developing your own State specific dicamba or auxin training for 2018? **Yes**

Q6 If your state sponsored and provided training last year, does your state plan to continue to offer state provided auxin or dicamba-specific training in 2018 to assist applicators in meeting the training requirement? **Yes**

Q7 Does the State Lead Agency, Extension System or another entity provide your training?

NCSU Cooperative Extension Weed Specialist

Q8 Does your state provide CEU's for the Dicamba or auxin specific training? **Yes**

Q9 Approximately how long does the training take from start to finish in hours?

Last year 1 hour 45 minutes. May be shortened to 1.5 hours for 2018.

Q10 Dicamba or auxin specific training is required yearly. Does your state have the resources (financial and personnel) to continue to provide this training? **Unknown**

Q11 Are there conditions that could be met that would change your mind from requiring state sponsored and delivered training to allowing registrant sponsored and delivered training?

Yes (If yes, please provide additional information below).

The following conditions would have to be met to accept registrant sponsored and delivered training.:

Program would need to be very similar to topics covered in NCSU's presentation.

Q12 It is important to understand the impacts of damage beyond soybeans and cotton. Can your state quantify damage to other crops/plants in 2017? (e.g., tomatoes, watermelon, cantaloupe, vineyards, pumpkins, organic vegetables, tobacco, residential gardens, trees and shrubs, etc.) Other crops/plants?

Tobacco is a significant concern in NC, but we do not have data regarding damaged acreage or crop loss. Some tobacco companies refused to buy grower's crop if there was damage - some growers lost their entire crop.

Q2 Is your state considering accepting registrant sponsored and provided dicamba or auxin specific training to meet the training requirement? **Yes**

Q3 What would be the conditions that you would require in order to accept registrant sponsored and delivered training?

Registrant to provide a summary of proposed training with listing of topics, anticipated length of training, list of proposed trainers

Q4 If your state would accept registrant dicamba or auxin specific training, would you accept in-person training, on-line training, both, or no preference? **In-person training preferred.**

Q5 Is your state considering developing your own State specific dicamba or auxin training for 2018? **No**

Q6 If your state sponsored and provided training last year, does your state plan to continue to offer state provided auxin or dicamba-specific training in 2018 to assist applicators in meeting the training requirement? **We did not sponsor or provide training last year.**

AAPCO State Dicamba Survey - Training and Damage

Q7 Does the State Lead Agency, Extension System or another entity provide your training?

Extension System currently provides general pesticide safety-related training and is considering special dicamba sessions for 2018 either taught by registrants or extension representatives at the end of our regularly scheduled training clinics

Q8 Does your state provide CEU's for the Dicamba or auxin specific training? **No**

Q9 Approximately how long does the training take from start to finish in hours?

Time period varies depending on topic (ex., 4+hrs. general standards or core training and 4+hours category training); Extension is considering possibly providing 1.5 hour special dicamba-related training for 2018 to be taught by either Extension or registrants at the conclusion of our regularly scheduled clinics

Q10 Dicamba or auxin specific training is required yearly. Does your state have the resources (financial and personnel) to continue to provide this training? **No**

Q11 Are there conditions that could be met that would change your mind from requiring state sponsored and delivered training to allowing registrant sponsored and delivered training?

Not applicable. State sponsored and delivered training is not required.

Q12 It is important to understand the impacts of damage beyond soybeans and cotton. Can your state quantify damage to other crops/plants in 2017? (e.g., tomatoes, watermelon, cantaloupe, vineyards, pumpkins, organic vegetables, tobacco, residential gardens, trees and shrubs, etc.) Other crops/plants?

We are still in the process of completing misuse complaint investigations from the 2017 growing season and do not have complete data at this time

Q2 Is your state considering accepting registrant sponsored and provided dicamba or auxin specific training to meet the training requirement? **Yes**

Q3 What would be the conditions that you would require in order to accept registrant sponsored and delivered training?

Knowledge of content, and training locations.

Q4 If your state would accept registrant dicamba or auxin specific training, would you accept in-person training, on-line training, both, or no preference? **In-person training preferred.**

Q5 Is your state considering developing your own State specific dicamba or auxin training for 2018? **No**

Q6 If your state sponsored and provided training last year, does your state plan to continue to offer state provided auxin or dicamba-specific training in 2018 to assist applicators in meeting the training requirement? **We did not sponsor or provide training last year.**

AAPCO State Dicamba Survey - Training and Damage

Q7 Does the State Lead Agency, Extension System or another entity provide your training?

Both the SLA and PSEP provide training. However, neither has provided dicamba specific training.

Q8 Does your state provide CEU's for the Dicamba or auxin specific training? **Not applicable**

Q9 Approximately how long does the training take from start to finish in hours?

We have not conducted any.

Q10 Dicamba or auxin specific training is required yearly. Does your state have the resources (financial and personnel) to continue to provide this training? **No**

Q11 Are there conditions that could be met that would change your mind from requiring state sponsored and delivered training to allowing registrant sponsored and delivered training? **Not applicable. State sponsored and delivered training is not required.**

Q12 It is important to understand the impacts of damage beyond soybeans and cotton. Can your state quantify damage to other crops/plants in 2017? (e.g., tomatoes, watermelon, cantaloupe, vineyards, pumpkins, organic vegetables, tobacco, residential gardens, trees and shrubs, etc.) Other crops/plants?

We have few acres of soybeans, and did not have over-the-top applications of dicamba. We are a high-value minor crops state, and many of our crops are highly sensitive to auxin herbicides. If thousands of acres were sprayed in July, it is possible that many Oregon crops would have incurred very costly and unacceptable damage.

Q2 Is your state considering accepting registrant sponsored and provided dicamba or auxin specific training to meet the training requirement? **No**

Q3 What would be the conditions that you would require in order to accept registrant sponsored and delivered training?

We would need to be convinced that registrant sponsored training met or exceeded that training developed by our land grant university. The ability to track participants would be required.

Q4 If your state would accept registrant dicamba or auxin specific training, would you accept in-person training, on-line training, both, or no preference? **In-person training only.**

Q5 Is your state considering developing your own State specific dicamba or auxin training for 2018? **Yes**

Q6 If your state sponsored and provided training last year, does your state plan to continue to offer state provided auxin or dicamba-specific training in 2018 to assist applicators in meeting the training requirement? **Yes**

Q7 Does the State Lead Agency, Extension System or another entity provide your training?

SLA in cooperation with Extension and industry

Q8 Does your state provide CEU's for the Dicamba or auxin specific training? **Yes**

Q9 Approximately how long does the training take from start to finish in hours?

2 hours

Q10 Dicamba or auxin specific training is required yearly. Does your state have the resources (financial and personnel) to continue to provide this training? **Yes**

Q11 Are there conditions that could be met that would change your mind from requiring state sponsored and delivered training to allowing registrant sponsored and delivered training? **No. Registrant sponsored and delivered training will not be accepted.**

Q12 It is important to understand the impacts of damage beyond soybeans and cotton. Can your state quantify damage to other crops/plants in 2017? (e.g., tomatoes, watermelon, cantaloupe, vineyards, pumpkins, organic vegetables, tobacco, residential gardens, trees and shrubs, etc.) Other crops/plants?

yes, zero reported damage to other crops

AAPCO State Dicamba Survey - Training and Damage

Q7 Does the State Lead Agency, Extension System or another entity provide your training?

U of A extension

Q8 Does your state provide CEU's for the Dicamba or auxin specific training? **No**

Q9 Approximately how long does the training take from start to finish in hours?

Online training is approximately 1 hr

Q10 Dicamba or auxin specific training is required yearly. Does your state have the resources (financial and personnel) to continue to provide this training? **Yes**

Q11 Are there conditions that could be met that would change your mind from requiring state sponsored and delivered training to allowing registrant sponsored and delivered training?

Yes (If yes, please provide additional information below).

The following conditions would have to be met to accept registrant sponsored and delivered training.:

Would need to review the manufacturers training course

Q12 It is important to understand the impacts of damage beyond soybeans and cotton. Can your state quantify damage to other crops/plants in 2017? (e.g., tomatoes, watermelon, cantaloupe, vineyards, pumpkins, organic vegetables, tobacco, residential gardens, trees and shrubs, etc.) Other crops/plants?

Not economic or yield damage

Q2 Is your state considering accepting registrant sponsored and provided dicamba or auxin specific training to meet the training requirement? **Yes**

Q3 What would be the conditions that you would require in order to accept registrant sponsored and delivered training?

We do not have any conditions for acceptance, however, would prefer EPA review and approval of registrant sponsored and delivered training.

Q4 If your state would accept registrant dicamba or auxin specific training, would you accept in-person training, on-line training, both, or no preference? **In-person training preferred.**

Q5 Is your state considering developing your own State specific dicamba or auxin training for 2018? **Unknown**

AAPCO State Dicamba Survey - Training and Damage

Q6 If your state sponsored and provided training last year, does your state plan to continue to offer state provided auxin or dicamba-specific training in 2018 to assist applicators in meeting the training requirement?

We did not sponsor or provide training last year.

Q7 Does the State Lead Agency, Extension System or another entity provide your training?

Virginia Cooperative Extension

Q8 Does your state provide CEU's for the Dicamba or auxin specific training?

Not applicable

Q9 Approximately how long does the training take from start to finish in hours?

NA

Q10 Dicamba or auxin specific training is required yearly. Does your state have the resources (financial and personnel) to continue to provide this training?

Unknown

Q11 Are there conditions that could be met that would change your mind from requiring state sponsored and delivered training to allowing registrant sponsored and delivered training?

Not applicable. State sponsored and delivered training is not required.

Q12 It is important to understand the impacts of damage beyond soybeans and cotton. Can your state quantify damage to other crops/plants in 2017? (e.g., tomatoes, watermelon, cantaloupe, vineyards, pumpkins, organic vegetables, tobacco, residential gardens, trees and shrubs, etc.) Other crops/plants?

While we have not received any reports of damage in our office, according to Extension, there are ~1500 acres that are damaged. The specific crops/plants are unknown.
