

FIFRA 25(b) Workgroup Update

Erica Millette, Chair

New Mexico Department of Agriculture

Sarah Caffery, Co-Chair

Office of the Indiana State Chemist

State Survey Results

2017

- 41 States require registration
- 5 States require efficacy data
- 11 States require the Complete Statement of Formula
- 12 States require the Safety Data Sheets

2018

- 43 States require registration or review
- 8 States require efficacy data
- 14 States require the Complete Statement of Formula
- 17 States require the Safety Data Sheets
- 27 States have adopted some or all of the Label Guidance

Data Guidance Compilation

- May 2018: Started Data Workgroup
 - Data Workgroup comprised of 8 SLAs
- May – August 2018: Created a draft Data Guidance document.
 - Utilized existing state requirements as a starting point
- August 2018: Presented Draft to full State Workgroup and Industry Workgroup
- October 2018: Revised and Finalized document, submitted to AAPCO board for review and approval

Data Guidance

- Provides baseline percentages for what is considered effective.
- Details what information needs to be included in testing.
- Specifies which mosquitoes and ticks are to be utilized in testing to support mosquito and tick claims.
- Does **not** specify specific methods to be used for testing.
- This is a **guidance** document not policy/law.

Concerns

- We have received concerns from numerous industry representatives.
- The workgroup is working on a response to concerns.
- The document will be updated as needed due to concerns and comments received.
 - All updates/revisions will be submitted to all workgroup members, State and Industry, prior to implementation.
