## Q9 Additional Comments

Answered: 18 Skipped: 11

#	RESPONSES	DATE
1	(1) During Crop Years 2018 & 2019, IDALS has only reported as OTT dicamba complaints confirmed applications of products approved for use in post-emergence applications of soybeans. This means that we have collected labels, application records, and applicator affidavits confirming that an OTT application of dicamba in soybeans took place. (2) IDALS does not make a distinction between particle drift or other types of drift. We enforce pesticide drift label violations when residues are documented by means of chemical analysis.	4/20/2020 6:18 PM
2	Due to Covid 19 Shelter at home implementation in Texas, there was not enough time to access all complaints manually and verify information requested such as #7. TDA does not track expenses per incident or meeting related to specifically dicamba. More info may be provided if extension were granted to provide information requested. Thank you	4/20/2020 4:06 PM
3	Both 2019 complaints involved DT beans vs Liberty Link beans.	4/20/2020 8:45 AM
4	We still have 197 alleged dicamba cases on which an action has not yet been taken.	4/17/2020 5:01 PM
5	Questions asked for specific details beyond the scope of our tracking. The bulk of our dicamba complaints ended in dead-ends because either no applicator IDed or multiple applicators IDed and investigations stopped due to no enforcement potential - did not continue investigation or run lab samples.	4/17/2020 12:22 PM
6	We do not track inspection expenditures for question #8.	4/17/2020 11:41 AM
7	Most producers have adopted the technology to protect themselves from drift.	4/17/2020 11:23 AM
8	Delaware had no reported dicamba drift complaints during the 2018 and 2019 growing season, however after the fact we did hear about unreported incidents, but these were not investigated, it was after harvest that we had heard about possible issues.	4/17/2020 8:51 AM
9	1. Dicamba expenditures in 2018 rose sharply from the need to build infrastructure to address the overwhelming volume of complaint investigations. 2. Dicamba expenditures dropped in 2019 as the result of a decision by OISC to offer complainants the option requesting either a enforcement investigation or a documentary only investigation. 3. The approval of these dicamba registrations may have altered OISC work plan priorities and activities for decades to come.	4/15/2020 10:11 AM
10	Dicamba showed up in a majority of the samples that SDDA took, but was hard to determine what application the off target movement was the result. Applications made in May and the first 15 days in June resulted in the best success rate of the products. No till farmers in SD, who use the product prior to planting or shortly after planting with a pre herbicide have the highest success rate of weed control and virtually no off target movement of the product	4/14/2020 4:20 PM
11	In our two 2019 dicamba drift incidents, Engenia & Extendimax respectively were both tank mixed with glyphosate. Dicamba-like damage was observed in both cases, but dicamba was not detected by the lab either case. Glyphosate was detected in the Engenia case, but not in the Extendimax application.	4/14/2020 9:41 AM
12	Florida has been extremely fortunate as we have not received any complaints involving dicamba in our cotton or soybean areas.	4/14/2020 8:09 AM
13	MANDATORY LABEL RECORD KEEPING REQUIREMENTS THAT ARE NOT DIRECTLY RELATED TO APPLICATION STANDARDS ARE OF LITTLE USE IN MITIGATING DAMAGE. I.E. DATE OF TRAINING, RECEIPTS OF PURCHASE, COPY OF PRODUCT LABEL, CROP PLANTING DATE AND APPLICATION TIMING.	4/13/2020 5:04 PM
14	New Jersey hasn't received reported complaints regarding dicamba	4/13/2020 3:51 PM
15	We did have a complaint in 2019 that involved an allegation of Dicamba (new chemistry) tank carryover. I didn't include this incident in above responses. It was our only 2019 Dicamba Complaint that I can recall.	4/13/2020 3:26 PM
16	Colorado has not yet seen an issue with Dicamba drift.	4/13/2020 3:11 PM
17	In all cases investigated, all were assessed enforcement action.	4/13/2020 1:29 PM
18	Cost was a SWAG - \$17x40 hours, plus lab costs of double that. Dicamba is not the issue, 2,4-D has the potential to be the issue here with cotton. Dicamba does not affect cotton like 2,4-D (new formulation) can.	4/13/2020 12:06 PM
