Bulletins Live! Two Updates

Presentation to SFIREG

December 10th, 2024

Recent Improvements to BLT

- Multiple product search capability

- Date printed time stamp (it's in the PDF footer)

- Improved function on mobile device web browsers

- First round of rich text formatting improvements

- "Zoom to" tools including "Zoom to filtered" and "Zoom to selected"

- Procedure to fit Godzilla (very high resolution, large) files into BLT

Planned Improvements to BLT

BLT "Advanced Resources" page

- Develop public API/Web Services
- BLT data download (easily download spreadsheets of AIs, etc. currently active in BLT, including option to filter this download by states/counties)
- BLT GIS Services (download the GIS shapefiles of PULAs currently in BLT)

Transition of BLT phone to softphone format

- Improve response process for BLT inquiries

Additional rich text formatting improvements

- Bold, italics, underlines, colored font, hyperlinks
- Spacing effects to break up long blocks of text (similar to bullet points)

Future Improvements to BLT

Continued dialog will help guide BLT improvements

Thank you for the white paper on BLT!

Address challenges for ESA strategies

Challenges with Strategy Implementation for BLT

Challenge: BLT built to be product specific

Challenge: Different strategies may apply to one PULA

Challenge: Intersection with existing PULAs

Solutions: We're working on it!
- User experience
- Clearly communicate requirements
- Flexible to work with multiple situations
