# EPA COOPERATIVE AGREEMENT

- PIRT's Cooperative Agreement is between USEPA's OECA and the NASDA Foundation.
- The five-year project period began August 2, 2024.
- PIRT is funded by State and Tribal Assistance Grant (STAG) funding.

# Funding

- PIRT was included in the recent review of Cooperative Agreements. PIRT was not terminated. PIRT has been notified that our funding is safe through September 30, 2025.
- [PIRT Program Overview](#)
- Per EPA's Budget in Brief, PIRT would be completely cut for Federal FY26. We do have sufficient FY25 funding to allow us to continue work, but that has not been broached at this time.
- While the federal budgets are being negotiated, we are proceeding as planned.

# ESA Compliance Workshop

## September 2024

# Workshop Overview

---

September 18-19, 2024, Philadelphia, PA

Pesticide regulatory agencies' inspection and compliance programs will be responsible for determining how pesticide applicators are implementing and complying with the ESA Strategy pesticide use requirements. Guidance and information on how to conduct inspections and determine compliance is needed by EPA and co-regulators (states, territories and Tribes) to ensure successful implementation of the ESA Strategies. This workshop served as an initial step toward forming a consistent and robust approach for monitoring compliance with pesticide use requirements related to EPA's ESA Strategies. The workshop focused on inspection processes for documenting pesticide applicators' compliance with the EPA ESA Strategies as they become implemented. Participants were asked to work together to identify issue areas and form recommendations for monitoring compliance with the run-off/erosion and drift mitigation measures, which are the core of the ESA Strategies.
