

FULL SFIREG MEETING

ED MESSINA, DIRECTOR
OFFICE OF PESTICIDE PROGRAMS
U.S. ENVIRONMENTAL PROTECTION AGENCY

JUNE 2, 2025

Administrator Zeldin's Pillars and OPP's Work

- **Pillar 1: Clean Air, Land, and Water**

- Utilizing new approach methodologies and integrating EDSP decisions and data needs into FIFRA decisions.
- Revising process for developing draft pesticide use limitation areas (PULAs) to protect listed species and critical habitat under the Endangered Species Act.

- **Pillar 3: Permitting Reform, Cooperative Federalism, and Cross-Agency Partnership**

- Reducing the backlog of PRIA and non-PRIA actions, continued transparency with industry on performance metrics and performance data to show where progress is being made and where more improvement is needed.
 - Since the beginning of FY 25 on October 1, 2025, our PRIA backlog went from 1,562 cases to 1,396, so we have generally been keeping up with the influx of new actions so far this FY.

Administrator Zeldin's Pillars and OPP's Work

- **Pillar 3: Permitting Reform, Cooperative Federalism, and Cross-Agency Partnership**
- Since the beginning of the fiscal year, our non-PIRA backlog decreased from 13,176 to 11,256 actions, so we've made some nice progress there. For this fiscal year, we're aiming to reduce the non-PIRA backlog by 25% and reduce the percentage of cases late for completed PIRA actions.
- Rolling out the MyPest, which for the first time allows registrants of pesticide products the ability to monitor the status of their pesticide registration submissions in real-time, providing much-needed transparency to the registration process.
- Implementing PIRA 5 deliverables to build efficiencies into our program. Actions like, reduced PIRA fee categories, further integration of MyPest and Salesforce, and increased use of structured labeling, would have significant positive impacts on our workstreams.
- Continuing work on Digital Labeling to make pesticide labels easier to submit, review, and ultimately, for consumers to read, crosses both pillars.

FY25 Goals

- Complete 30 new Als by September 30, 2025.
- Complete 40 new uses, by September 30, 2025.
- Reduce overall backlog (cases past their due date) of non-PRIA cases from baseline in FY 2024 of 14,000 actions down to 10,000 actions by the end of the fiscal year for a total reduction of 25 percent, by September 30, 2025.
- Reduce overall backlog (cases past their due date) of notifications and amendments from baseline in FY 2024 of 4,195 actions down to 1,000 actions by the end of the fiscal year for a total reduction of 25 percent, by September 30, 2025.
- Reduce average days late and percentage of cases late for completed PRIA actions from FY 24 average of 170 days and 76 percent, respectively, by September 30, 2025.

FY25 Goals

- Complete 4 Preliminary Work Plans
- Complete 1 Final Work Plan
- Complete 4 Proposed Interim or Final Decisions
- Complete 7 Interim Decisions
- Complete 1 Final Decision
- Implement office-wide digital transformation to move data and legacy apps to a cloud-based format.

FY25 Goals

- Implement six office-wide process improvements projects to provide measurable results for increasing the speed and timeliness of pesticide applications.
- FTE levels managed within FY25 enacted payroll budget to support priority registration actions
- Foster strong collaboration with Federal, State, NGO, and Industry Associations.
- Appropriately represent Agency priorities and policies at various, requested speaking engagements at Federal, State, NGO, and Industry association meetings.

PRIA COALITION SUPPORTED EFFORTS AND COLLABORATION

- January 6, 2025, letter from the Coalition described support for eight ongoing OPP process improvement projects
 - Non-PRIA backlog reduction
 - Update to PRN 98-10
 - Revising CSF formatting scheme
 - Increasing predictability in acute tox and product chem review times
 - Update to PRN 98-1
 - Structured and digital labeling efforts
 - Greater use of Salesforce in the science divisions
 - ISB process improvements
- OPP appreciates the support and continues to make progress in these areas

PROCESS IMPROVEMENT PROJECT EXAMPLES ACROSS OPP

- Tracking, communicating, and reporting registration and registration review deliverables and timelines using lean visual management across all of OPP, including science divisions.
- Standardization, templates, and draft industry analysis to assist timely OPP review
 - DER template creation/revisions
 - Developing technical screen guidance
 - Guidance to registrants on providing benefits info for new conventional AIs/new uses
 - Identifying which risk assessments can be streamlined (e.g., lower risk chemicals)
 - Standardizing “raw data” formats to shorten review time
 - Sharing/posting regulatory checklists with registrants

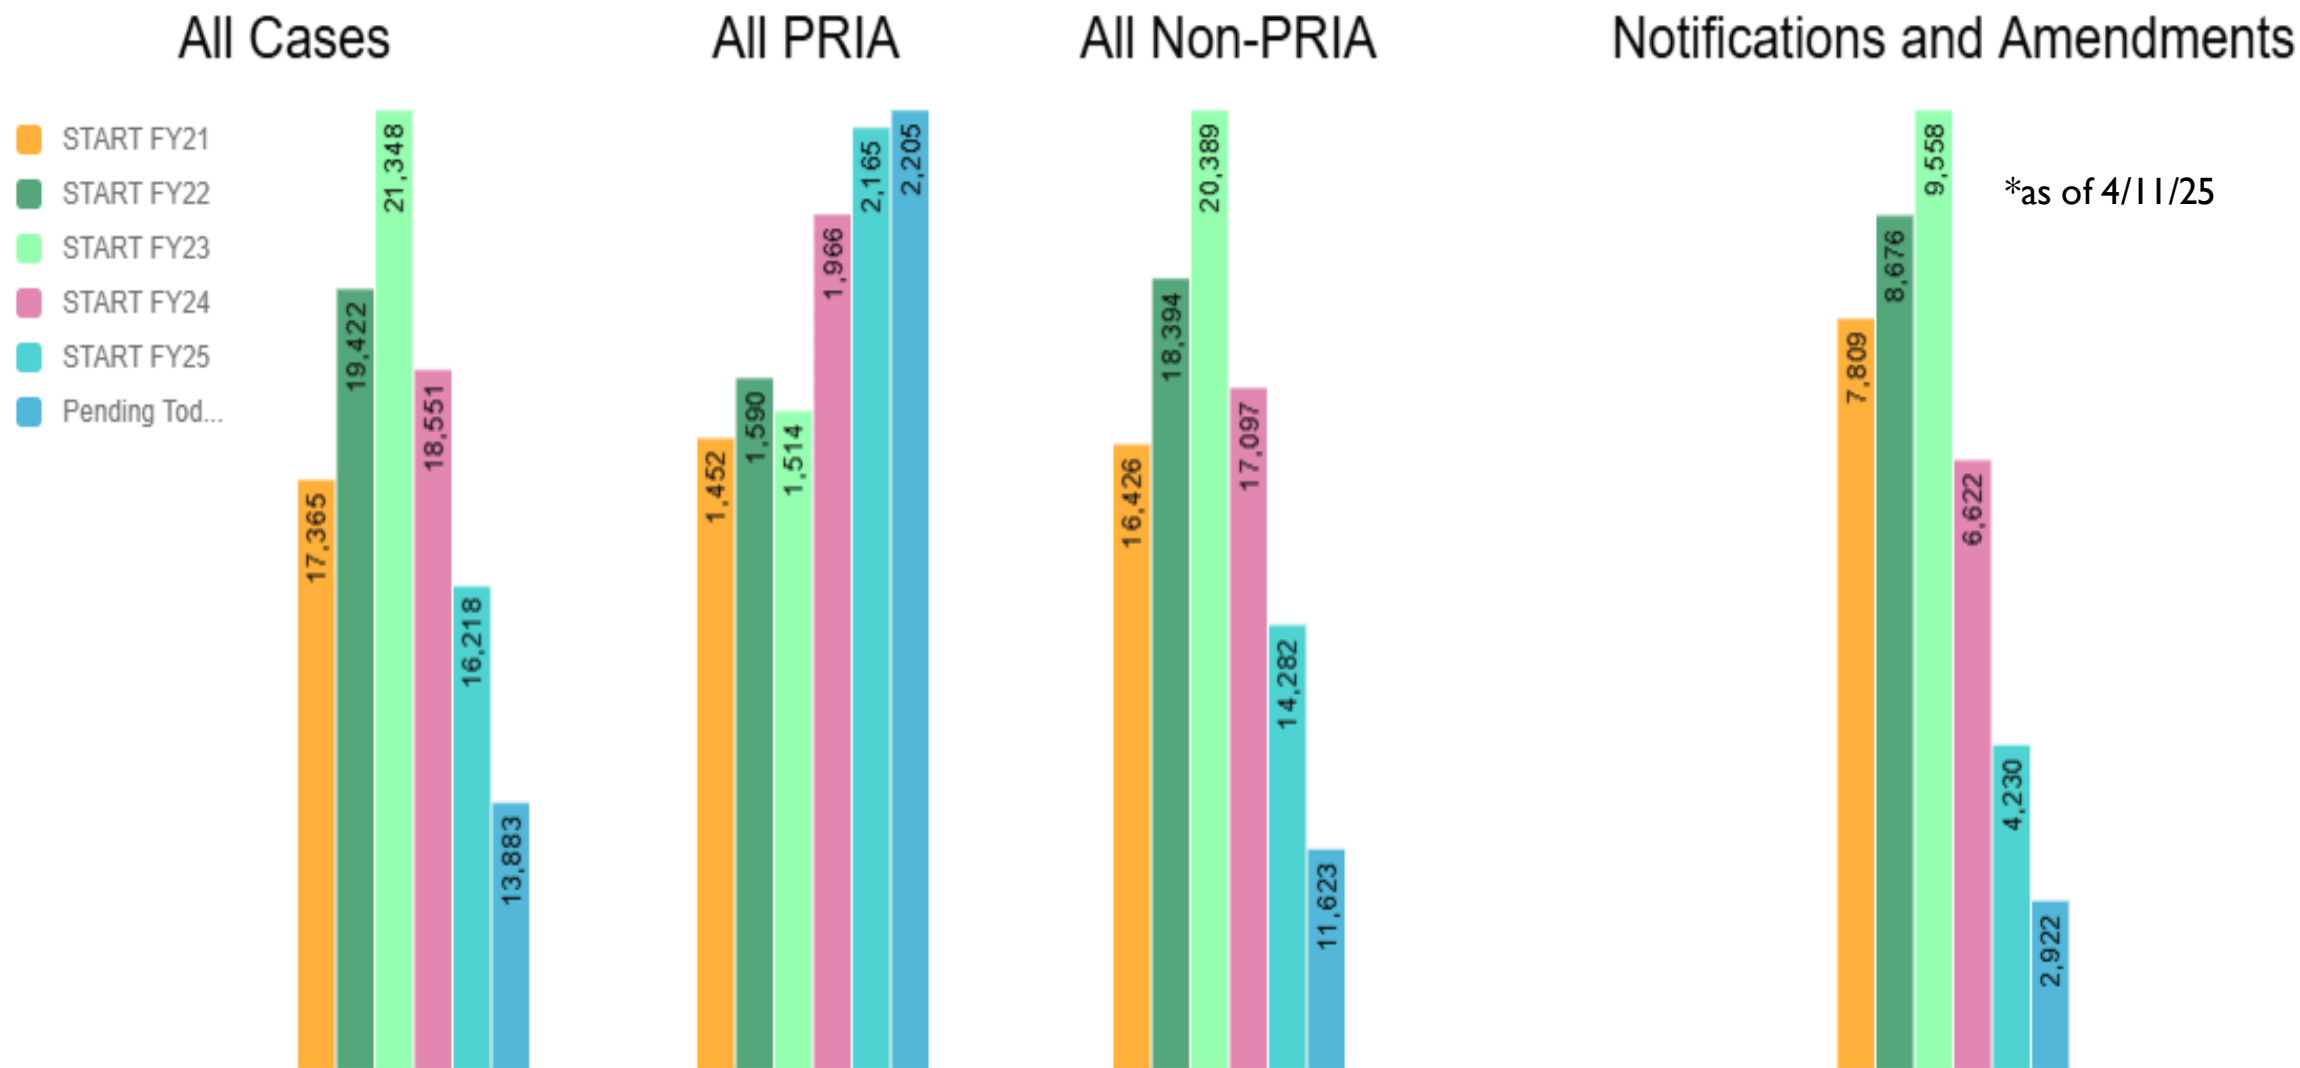

PROCESS IMPROVEMENT PROJECT EXAMPLES ACROSS OPP

- Use of Automation and digital labeling tools to speed review timelines
 - Use of coded program to batch similar public comments
 - ESA tool improvements (web-based app, automation of BE analyses)
- Sharing resources across divisions:
 - BEAD lab efforts to review product chem, acute tox, and efficacy data for RD/AD
 - Expansion of registration review label review with HED to reduce backlog
 - Sharing regulatory expertise and staff time across PRD and RD
- Fast-track amendment strategies to increase completions
- Planned administrative withdrawal of certain AD non-coded PRIA submissions FRN

DIGITAL TRANSFORMATION UPDATE

- Document Solutions Project and Data Solutions Project: Moving to cloud based, low code solutions to lower ongoing costs, extracting data automatically (e-label) to lower contract costs and utilizing AI tools to lower science contract costs;
- Process Automation, Data Analysis, Visualizations: Process Automation (DCI Builder/letters), process mapping (OPP-wide), time to delivery (science staff to regulatory staff), time in process steps of workflows and workload (touch-time and level of effort performance metrics).
- Customer-facing information through MyPest App: Externally facing dashboards to improve customer experience for pesticide registrants to track submitted actions and obtain projected completion dates and bi-directional communication with OPP (PRIA 5 deliverable).

MyPest Dashboard

v2 April 2025

Program Updates

Insecticide Strategy (IS)

- On April 29, EPA issued the final Insecticide Strategy that identifies practical protections for federally endangered and threatened species from the use of insecticides, while providing flexibility for pesticide users and growers.
- The Strategy identifies mitigations aimed at protecting more than 900 species listed by the U.S. Fish and Wildlife Service (FWWS) that EPA considers when it registers a new insecticide or reevaluates an existing one.
- We may amend the Strategy and supporting documents based on lessons learned from implementation through FIFRA actions and stakeholder engagement and will provide further updates as needed.
- We continue to refine our PULA maps to better identify where mitigations are needed.

Insecticide Strategy (IS)

- Some of the science-based modifications from the draft to the final strategy include:
 - Reducing buffer distances across all application methods;
 - Providing credit for any reduction in the proportion of a treated field for ground applications;
 - Developing a process to qualify conservation programs that will give growers more credit for being part of a conservation program than initially proposed;
 - Developing a process to qualify external parties that would assess a grower's farms and determine the existing mitigation points that could be achieved by practices a grower already has in place;
 - Updating key data sources and identification of invertebrate species that may occur on agricultural fields;
 - Adding a Pesticide Use Limitation Area (PULA) group for generalist species that reside in wetlands to reduce mitigations applied outside of wetland habitats.

New Pesticide for Varroa Mite Control

- On May 29th, EPA proposed to register one technical and two end use products containing the new active ingredient Vadescana, a double stranded RNA (dsRNA), for control against *Varroa* mites (*Varroa destructor*) in honey bee hives.
- In March 2025, EPA registered a new varroacide product containing l-glutamic acid, an active ingredient that has not previously been included in registered products for use in bee hives.
- EPA also intends to register another product containing oxalic acid, a slow release varroacide within bee hives, by July 2025.
- Together, these four end use products are expected to provide new tools, including novel active ingredients, for control of *Varroa* mites in bee hives.
- EPA will continue to work with the USDA, states and honey bee industry stakeholders in coordinated efforts to provide support for the beekeeping community.
- EPA is also working in collaboration with the National Pesticide Information Center, the North Carolina Department of Agriculture and Consumer Services and Canada's Ministry of Agriculture for Fisheries and Food to develop educational and training content about bee kill investigations.
- The proposed registration of these products and public comment are available in docket ID EPA-HQ-OPP-2023-0558 at www.regulations.gov. The public comment period will close on June 12, 2025.

OPP PREP 2025 Schedule

- Senior Executive PREP, June 24-26th
- Comprehensive Combo PREP, August 4-7th
- Possibly, ESA Combo PREP, September 8-11th

Upcoming OPP 2025 Crop Tours: Tentative Schedule

(OPP POC: Jasmin Jackson)

Host	Location	Dates
IR-4	DC area (regional)	June 11, 2025
AEM (& Partners) Precision Ag Field Demo Day	Newburg, MD	June 12, 2025
North Dakota Grain Growers Association E-Tour	Grand Forks, North Dakota	June 23-27, 2025
California Rice Commission	Sacramento, CA	July 2025
Snake River Sugarbeet Tour	Idaho (TBD)	July 20-24, 2025
Michigan Corn	Michigan (TBD)	TBD
California Specialty Crops Council	California (TBD)	August 4-7, 2025
Corteva Chesapeake Farms	Chesapeake Farms, MD	August 12-14, 2025
National Potato Council	Bangor, Maine	August 18-21, 2025

Thank you!
